System Store Solutions Ltd

System Store Solutions Ltd is experienced in meeting the specialised needs of museum, gallery and heritage clientele.

With a huge range of innovative storage and display systems it has supplied art, photographic, geological, textiles, transport, historical, and armoury museums throughout the UK and Ireland.

Our product portfolio includes a comprehensive range of Drawer Cabinets, Adjustable Shelving, Visual Display Cabinets and Cupboards, Glass Plate and Negative Storage Systems, Mobile Roller Racking, Picture Racking Systems and Containers.

We also provide project management, consultation, technical advice and no obligation site surveys to ensure the best solution possible for your storage and display needs.

Museum Storage

The preservation of a nation's heritage has always been compromised by the ability to store it safely. Today's museum managers also think about efficiency, space optimisation and high capacity storage solutions adapted to each kind of collection.

System Store Solutions Ltd offer innovative storage solutions to meet any requirement...

Mobile Shelving/Roller Racking

Mobile storage systems can provide more than double the storage capacity of conventional systems, with the reassurance of added security. Our standard range can be tailored to individual requirements to include shelving, cabinets, drawers, hanging garment rails and filing systems. Mobile systems are highly effective in maximising floor space.

Display Shelving & Cupboards

To create the optimum public viewing platform, as well as safety and protection of valuable collections, our display solutions offer airtight, dust-free environments while providing tailored solutions for specific requirements.

Visual Browser Display Cabinets

Equipped with special inserts and fitted with 6.4mm laminated glass tops, our drawer cabinets offer a secure solution with two high security locks per drawer.

The display cabinets are available in a variety of sizes and various depths can accommodate different collections, while allowing the finest viewing display for the artefacts.

Horizontal and vertical display units can also be fitted on top of each cabinet, utilising valuable floor space.

Museum Shelving/Film Negative Storage

Safeguarding fragile and irreplaceable items can be stored securely using flexible storage organisation of shelving, drawers and cupboards, utilising space more efficiently. Film negatives and photographic storage can be achieved through versatile drawer configurations in a dust-free environment. Up to 3,600 negatives can be stored in just one drawer with the flexibility of special interlocking divider systems and different sizes of drawers.

Plan Filing, Maps & Document Storage

Our system offers the perfect solution to store paper documents in an organised, secure cabinet. Historic plans, maps and documents can easily be identified in the drawer cabinets, which provides a more orderly storage solution that simplifies location procedures.

Art Storage Systems

Our practical, safe, visible and accessible picture racking system ensures the safekeeping of artwork. The double-sided, unique mesh panels offers greater capacity with vertical pullout drawers that are flush to the art rack frame. The storage arrangement is limitless... especially where floor space is limited.

Armoury/Gun Storage

We offer multiple storage solutions for armoury collections including cabinets, drawers or mesh panels. Our systems provide secure storage for a variety of weapons and ammunition that are flexible in the type and quantity of armoury stored.

Textiles & Wallpaper Storage

Adjustable hanging rails, rolls and unique drawer trays, safely store textiles and garments. The flexibility of the design of this system enables textiles to be removed from the system; worked on and placed back, providing ease of access and security in one solution.

SEIRS standard for excellent installations

System Store Solutions are professionally recognised as being trained to SEIRS (Storage Equipment Installers Registration Scheme) standards. The SEIRS standard is an initiative from SEMA to drive development of high quality workmanship in the industry. SEIRS aims to improve safety standards in an environment where product design, manufacture and installation take place under the influence of increased legislation.

Systems Store Solutions have completed the SEIRS safety training courses that are storage industry specific. The courses have been designed by professionals in the industry and are based on SEMA's installation guidelines. All staff at Systems Store Solutions are professionally recognised as being trained to SEIRS standards and carry official SEIRS ID cards.

The benefits of being SEIRS accredited include professional installation, adherence to SEMA guidelines, a means to verify qualifications, reassurance and customer satisfaction. The initiative benefits end-users, inspectors and officials involved in the installation process.

A broad range of museum display and storage options...

...for the storage of:

- **Display cases**
